Vehicles

Company Car Benefits
 The taxable benefit is calculated as a percentage of the car's UK list price. The calculation begins with the car's CO₂ emissions in grams per kilometre. Then deduct 130 and divide this result by 5. Round down (4.9 = 4) and then add 15 (petrol) or 18 (diesel). The result is the taxable percentage.

	Petrol	Diesel
Minimum rate*	15%	18%
Maximum rate	35%	35%

*Special rules apply to some other environmentally friendly cars.

For cars first registered before 1 January 1998 special rules apply.

Chargeable on employees earning £8,500 or over (including benefits) and directors. The list price relates to the day before first registration and includes accessories. The price is subject to an upper limit of £80,000. The list price is reduced by the employee's capital contribution, subject to a maximum deduction of £5,000. Special rules apply to cars at least 15 years old with a market value of £15,000 or more. Van, no benefit for certain environmentally friendly vans or if restricted private use condition met; otherwise van benefit £3,000, fuel £550. Payments by employees for private use may reduce the above benefits.

HM Revenue & Customs (HMRC) Mileage Rates

Employees using their own car for business: approved rates are 40p per mile for the first 10,000 miles and 25p thereafter. Income tax and NICs may be due on higher rates and tax relief may be due on lower rates.

Company cars: from time to time HMRC publish advisory fuel rates which apply where employees are reimbursed for business travel or are required to repay the cost of fuel for private travel.

Company Car Fuel Benefit

Where the cost of all fuel for private use is borne by the employee, the fuel benefit is nil. Otherwise, the taxable benefit is calculated as the car benefit percentage (see above) of £18,000. VAT is payable by the business by reference to the CO₂ emissions (rounded down to next multiple of 5) as follows:

VAT fuel scale charges for 3 month return period beginning on/after 1 May 2010
